APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions: This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The water under this permit and Permit Numbers 33886 and 33887 is supplemented by water from the Truckee River and Roberts Creek under Permit Numbers 33881, 33882, 33883, 33884 and 33885 which change Claim Numbers 50.50A, 97 and 97A under the Truckee River Final Decree and State Engineer's Permit No. 15227. The total combined diversion of water under this permit and Permit Numbers 33886 and 33887 shall be limited to a maximum diversion rate of 0.557 c.f.s., but not to exceed 315 acre-feet per year for 243 residences, and 10 acres of open space. Surface water rights from the Truckee River and Roberts Creek under Permit Numbers 33881, 33882, 33883, 33884 and 33885 in the amount of 315 acre-feet per year must remain appurtenant to the Belli Ranch subdivision as described in the place of use on the permits and may not be moved to other uses or areas.

This permit is further subject to the terms and conditions set forth in the State Engineer's oral ruling of March 16, 1978. Individual water meters shall be installed in the service line to each residence served.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and

not to exceed 0.557 cubic feet per second, but not to exceed 315
acre-feet annually.

Actual construction work shall begin on or before October 17, 1978

Proof of commencement of work shall be filed before November 17, 1978

Work must be prosecuted with reasonable diligence and be completed on or before October 17, 1979

Proof of completion of work shall be filed before November 17, 1979

Application of water to beneficial use shall be made on or before October 17, 1982

Proof of the application of water to beneficial use shall be filed on or before November 17, 1982

Map in support of proof of beneficial use shall be filed on or before November 17, 1982
